Hao Xu

High Performance Computing with Data Science postgraduate student at the University of Edinburgh

haoxu.edu@outlook.com | linkedin.com/in/hao-xu-xiao | github.com/Xiao001010

ACADEMIC EXPERIENCE

University of Edinburgh, Edinburgh, UK

MSc in High Performance Computing with Data Science   *Sept, 2024 - Sept 2025*

- Most modules are HPC related: Thread Programming (OpenMP), Massage-Passing Programming (MPI), Advaced Message-Passing Programming, Performance Programming (MPI), HPC Architecture, Accelerated Systems: Principles and Practice
- The left modules are Machine Learning related: Fundamental of Data Management, High Performance Data Analytic, Machine Learning and Pattern Recognition, Machine Learning at Scale, Reinforcement Learning

University of Sussex, Brighton, UK   First Honor

BSc in Computer Science & Artificial Intelligence   *Sept, 2022 - June 2024*

- Most modules are Computer Science and Artificial Intelligence based: Fundamentals of Machine Learning; Computer Visions; Neural Network; Natural Language Engineering; Advanced Natural Language Engineering; Acquired Intelligence & Adaptive Behaviour (Evolutionary algorithms and Genetic algorithms); Knowledge & Reasoning (Search algorithms, Heuristics, Semantic networks, and Bayesian networks); Databases; Program Analysis (Algorithms analysis); Introduction to Computer Security; Human-Computer Interaction
- Left modules are Neuroscience and Linguistics based related to AI: Principles of Neuronal Function & Dysfunction; Language, Mind and Brain

Soochow University, Soochow, China   Grade: 84%

International Bachelor-Sussex Excellence AI Programme at Soochow University   *Sept, 2019 – Jun, 2021*

- Most modules are Computer Science and Mathematics based: Calculus; Linear Algebra; Probability Theory; Discrete Mathematics; Data Structure; Python Programming; JAVA Programming; Network Programming; Microcomputer Principle & Interface Technology (Microcomputer systems principle and Assembly language programming); Databases; Software Engineering
- Left modules are Artificial Intelligence based: Introduction to Artificial Intelligence; Machine Learning; Computer Visions

EMPLOYMENT HELD

Natural Language Engineering Teaching Assistant | *University of Sussex*   Oct, 2023 – Dec, 2023
- ∗ Teach second-year undergraduate students the fundamental principles of the module NLE.
- ∗ Teach the Natural Language Engineering labs, take students through the coding problem set
- ∗ Help struggling students solving exercises

Junior Research Associate | *University of Sussex*   Jul, 2023 – Sept, 2023
- ∗ ML for Cell Classification from Partial Information Supervised by Dr. Ivor Simpson
- ∗ Do segment on cell micrographs, generate complete four-channel cell micrographs and classify the cycle phase
- ∗ Fine-tune CellPose, build and train VAE and CNN classifier in PyTorch

Intern in AI R&D department | *Focus Technology Co., Ltd.*   Sept, 2021 – Jun, 2022
- ∗ Involve in image data cleaning, image classification, and object detection with Yolo
- ∗ Use image matting to refine the pixels of items edges to make the extracted item sharper
- ∗ Train CLIP models for Ali Tianchi's CVPR 2022 AliProducts Challenge for text-image retrieval

Intern in Data Analysis department | *Nanjing Maiyuchuang IT Co., Ltd*   Jun, 2021 – Aug, 2021
- ∗ Involve in the development of the opinion analysis system
- ∗ Crawl news with Scrapy and Pre-processing news data
- ∗ Train BERT to implement sentiment classification and text classification functions

SKILLS

* Programming Languages: Python > C = C++ > Java = PHP
* Proficiency in machine learning libraries such as Numpy, Pandas, Matplotlib, PyTorch, etc.
* Proficiency in Linux, SQL, LaTeX, Git
* Knowledge of essential machine learning, computer vision and natural language processing algorithms
* Knowledge of Computer architecture, parallel computing, GPU acceleration and data management
* Ability to reproduce deep learning cutting edge literature
* Ability to use Docker
* Good foundation in mathematics
